

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

short papers of interest to systematists. He calls attention¹ to the distinctness of the Venezuelan form of *Rhodinocichla rosea* for which the name *vulpina* Hartlaub is available, making four races of this interesting bird. The Arabian Sea Tern, he renames² *S. repressa* (p. 288), type from Fao, Persian Gulf; the name *albigena*, by which it has been known, proving to be untenable. The record of *Arenaria melanocephala* for India based upon a specimen in the Philadelphia Academy received from Capt. Boys, is challenged³ by Dr. Hartert as there is no definite proof that it came from India. This point seems to be well taken and the range in the A. O. U. Check-List should be revised accordingly. A study of the European Cormorant⁴ results in the differentiation of two races—a larger, northern one, *Phalacrocorax carbo carbo* (L.), nesting on rocks, and a smaller, more southern one, *P. c. subcormoranus* (Brehm), nesting mainly on trees. Another paper⁵ records a number of errors of synonymy and reference in Vol. XXV of the 'British Museum Catalogue.'

In conjunction with Lord Rothschild there is a review of some forms of *Coracina* (*Graucalus* Auct.) from the Solomon Islands.⁶ *C. welchmani kulambangrae* (p. 289), Kulambangra, and *C. papuensis perpallida* (p. 290), Bougainville, are described as new. A new *Monarcha*, from Rossel Island is also described,⁷ *M. cinerascens rosselianus* (p. 297).—W. S.

Mearns on *Pardaliparus elegans*.⁸—This carefully prepared paper adds another to the long series of similar reviews that have resulted from Dr. Mearns' studies of the extensive collections made by him in Africa and the Philippines. His untimely death shortly after the appearance of the present paper, has prevented his personal preparation of the comprehensive report to which these were but preliminary, a loss to science which will ever be deplored. It is to be hoped however, that some one else may complete this work as a fitting memorial to Dr. Mearns.

Seven races of *Pardaliparus elegans* are here differentiated of which *P. e. panayensis* (p. 57), Panay Isl., Philippines; *P. e. guimarasensis* (p. 58), Guimaras Isl., and *P. e. suluensis* (p. 59), Sulu Isl., are described as new.—W. S.

¹ On the Forms of *Rhodinocichla rosea*. By Ernst Hartert. *Novitates Zoologicae*, Vol. XXIII, p. 229. September, 1916.

² What is the Correct Name of the Arabian Sea Tern. By Ernst Hartert. *Ibid.* p. 288.

³ The Alleged Occurrence of *Arenaria melanocephala* (Vig.) in India. By Ernst Hartert. *Ibid.*, pp. 291-292.

⁴ On the European Forms of *Phalacrocorax carbo*. By Ernst Hartert. *Ibid.* pp. 293-295.

⁵ More Erroneous Quotations and Other Errors. By Ernst Hartert. *Ibid.* pp. 295-296.

⁶ On Some Forms of *Coracina* (*Graucalus* Auct.) from the Solomon Islands. By Lord Rothschild and Ernst Hartert. *Ibid.* pp. 289-291.

⁷ A New *Monarcha* from Rossel Island. By Lord Rothschild and Ernst Hartert. *Ibid.* p. 297.

⁸ On the Geographical Forms of the Philippine Elegant Titmouse, *Pardaliparus elegans* (Lesson), with Descriptions of three New Subspecies. *Proc. U. S. Nat. Mus.*, Vol. 51, pp. 57-65. October 16, 1916.
